

What do clients say about Physiofunction?

“Hard work under expert guidance has paid off. I am back playing golf, hitting the ball further than before my stroke”
MW, Badby

“After my stroke, I never thought I would walk again. How wrong I was. Having just walked up Ben Nevis, I have now completed my personal three Peaks challenge.
HB, Earls Barton

“You more than anyone over the last two years, gave him the hope and courage to face life with his disability.”
SP, Sutton-In-Ashfield

“My confidence has greatly improved and I am driving again”
II Long Buckby

How soon can I be seen?

Appointments are usually available within five working days.

How often should I attend?

It depends on many factors. Your initial appointment will be a comprehensive assessment to establish your individual needs and recommendations for future treatment will be provided.

Where can I receive treatment?

PhysioFunction offers both clinic based appointments and home visits. We can also visit clients in nursing homes and residential homes.

What additional services do you offer?

- ✓ Medical reports for legal purposes
- ✓ Video movement analysis
- ✓ Medical Management of Spasticity
- ✓ Complex Posture Management
- ✓ Teaching & Training

Can you advise on other therapy services?

Following your assessment, we will advise you whether you need to seek further assessments, for example Occupational Therapy or Speech Therapy.

Do I need a referral?

No, you can contact PhysioFunction directly to book an appointment in the location that best suits you. However, if you have private medical insurance you may need a GP or Consultant referral to make a claim.

What's the first step?

Call Physiofunction today for a FREE telephone consultation and we will guide you towards your goals.

Can PhysioFunction help me?

PhysioFunction has helped many people with the following conditions

- ✓ Strokes
- ✓ Head injuries
- ✓ Spinal Cord injuries
- ✓ Multiple Sclerosis
- ✓ Parkinson's Disease
- ✓ Cerebral Palsy
- ✓ Motor Neurone Disease
- ✓ Other related Neurological conditions

PhysioFunction has helped people overcome difficulties with:

- ✓ Balance
- ✓ Hand & arm function
- ✓ Leg & foot function
- ✓ Walking
- ✓ Spasticity
- ✓ Spasm
- ✓ Pain

As you know these difficulties reduce your independence and opportunities for leisure, sport and work.

PhysioFunction

What is so different about Physiofunction?

We have been successful helping our patients because:

- ✓ We are able to devote the time required to address these problems
- ✓ Our Physiotherapists are specialists in the treatment of the Neurological conditions above
- ✓ We use the latest rehabilitation technology and products to speed up recovery, many of which are not provided by the NHS.
- ✓ We are experienced in helping clients make improvements long after, and in many cases years after their initial illness or injury.

What will it mean for me?

By working with PhysioFunction to maximise their independence in daily activities, our clients have renewed energy and physical ability to devote to both leisure and vocation.

For each client the goals have been different:

- ✓ visiting friends and family
- ✓ enjoying the theatre and dining out
- ✓ walking to the shops
- ✓ driving
- ✓ returning to sport
- ✓ starting work again

We will assess your possible goals at our first face-to-face consultation.

Who will treat me?

Our team of highly trained specialist Neurological Physiotherapists offer a wide base of knowledge and expertise in Neurological rehabilitation. They will provide one-to-one treatments specifically tailored to your needs.

Physiotherapy programmes can also be carried out under the supervision of one of our Assistant Practitioners. Alternatively, we can offer supervised gym sessions with Therapeutic Exercise Instructors.

How will innovative technology help me?

We offer expertise in the use of leading edge technology to assist with recovery and rehabilitation of Neurological conditions. Our Physiotherapists have had great success in treating the following impairments:

- ✓ **Foot-drop**
Avoid catching your foot and tripping by using an electrical muscle stimulator that lifts your foot as you step
- ✓ **Poor and absent hand function**
Relearn how to open and close your hand using the Saeboflex™ hand orthosis
- ✓ **Weak and paralysed muscles**
Strengthen muscles or maintain muscle bulk in paralysed muscles with our affordable electrical stimulators
- ✓ **Tight muscles**
Loosen tight muscles with our effective splinting solutions
